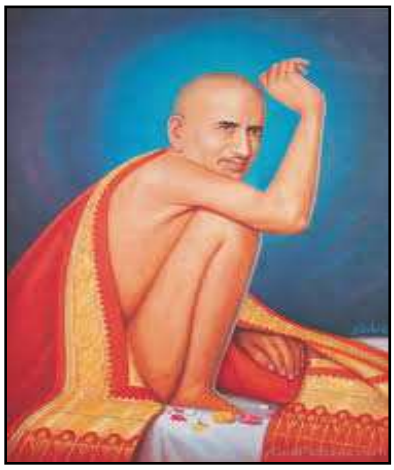
NEWS LETTER – JANUARY 2023



Vision

Empowerment through Knowledge

Mission

To educate the students to transform them as professionally competent and quality conscious engineers by providing conducive environment for teaching, learning, and overall personality development, culminating the Institute into an International seat of excellence.

Faculty Achievements:

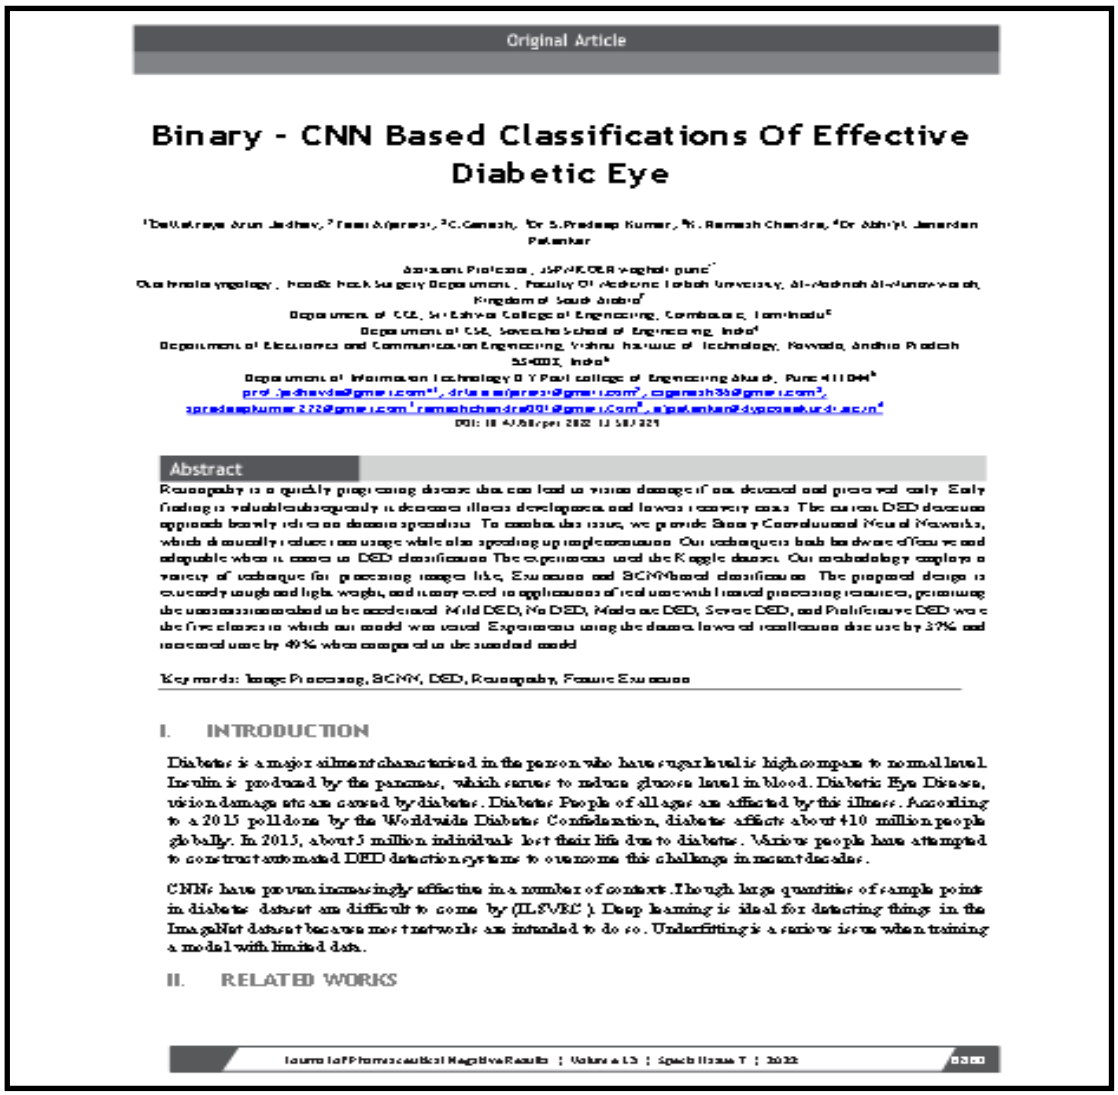
1 Dr A.J.Patankar has been Awarded SPPU PhD Guide

2.Dr A.J.Patankar has Published paper entitled “Binary– CNN Based Classifications of Effective Diabetic Eye” in Journal of Pharmaceutical Negative Results on 03/01/2023.



Original Article

Binary - CNN Based Classifications Of Effective Diabetic Eye

[illegible]

Abstract

[illegible]

Keywords: Image Processing, SCNN, DED, Retinopathy, Fovuric Exudates

I. INTRODUCTION

Diabetes is a major ailment characterized in the person who have sugar level is high compare to normal level. Insulin is produced by the pancreas, which serves to reduce glucose level in blood. Diabetic Eye Disease, vision damage etc are caused by diabetes. Diabetes People of all ages are affected by this illness. According to a 2015 poll done by the Worldwide Diabetes Confederation, diabetes affects about 410 million people globally. In 2015, about 5 million individuals lost their life due to diabetes. Various people have attempted to construct automated DED detection systems to overcome this challenge in recent decades.

CNNs have proven increasingly effective in a number of contexts. Though large quantities of sample point in diabetes dataset are difficult to come by (ILSVRC). Deep learning is ideal for detecting things in the ImageNet dataset because most networks are intended to do so. Underfitting is a serious issue when training a model with limited data.
